

Precast concrete septic tanks

The *Health (Treatment of Sewage and Disposal of Effluent and Liquid Waste) Regulation 1974* requires precast concrete septic tanks to be approved by the Executive Director, Public Health.

Manufacturing of septic tanks in compliance with the Australian Standard

For many years the Department of Health (DOH) has independently assessed and approved the construction of septic tanks. However, Standards Australia has developed an Australian Standard **AS/NZS 1546.1:2008: On-site domestic wastewater treatment units - Septic tanks** for this purpose.

DOH approvals issued more than 5 years ago are now out of date with industry standards and best practices.

DOH now requires all manufacturers' to comply with the [Code of Practice for Product Approval of Onsite Wastewater Systems](#) which requires all septic tanks to be certified to AS/NZS 1546.1. This will ensure that the quality standards of all septic tanks manufactured in WA are in line with the Australian Standards.

Approved precast concrete septic tanks manufacturer in WA:

Business Location	Manufacturer	Model	Capacity (L)
